

Job Descriptions

Python Developer

Role Overview:

We are looking for a Python Developer to build scalable applications and backend services.

Responsibilities:

- Develop and maintain Python-based applications
- Write reusable, testable, and efficient code
- Work with APIs and databases
- Debug and improve existing systems
- Collaborate with cross-functional teams

Skills Required:

- Strong knowledge of Python
- Understanding of frameworks like Flask or Django
- Knowledge of databases (SQL/NoSQL)
- Basic understanding of REST APIs
- Problem-solving skills

Machine Learning Engineer

Role Overview:

We are seeking a Machine Learning Engineer to design and deploy ML models for real-world applications.

Responsibilities:

- Build and train machine learning models
- Work with datasets for data preprocessing and feature engineering
- Deploy ML models into production systems
- Evaluate model performance and optimize algorithms
- Collaborate with data engineers and developers

Skills Required:

- Strong knowledge of Python
- Experience with libraries like NumPy, Pandas, Scikit-learn, TensorFlow or PyTorch
- Understanding of statistics and machine learning concepts
- Knowledge of data preprocessing and model evaluation techniques
- Problem-solving and analytical thinking
